

# Animal friendly production of kid meat

On a world wide scale the Netherlands is an important exporting country of kid meat. Goat farming has grown explosively over the last few years. The Pali Group is an important chain manager in the production process of kid meat. The milk goat farmer, the fattening farm, the transporter, the feed supplier and the slaughterhouse work intensively together to guarantee the quality of the end product.

The well-being and health of the animals are kept in mind in all of the links along the chain. The kids are housed communally on straw. Throughout the whole growing process the animals are fed following a well-balanced pattern. The well-being during transport has not been lost sight of either. We use the services of leading transporters in possession of the Veewaar-dig Vervoer certificate (Livestock friendly Transport).

The Pali Group trades on a European level in:

- kids
- goats.

We produce and sell:

- kid meat
- goat meat.

  
**PALI GROUP**

Our own specialists and nutrition experts support the fattening farms contracted by the Pali Group with expert advice and personal supervision. The Pali Group possesses world wide markets for both kid meat and goat meat. Supplying supermarkets and shops directly at home and abroad is also an option.

The Pali Group has built up an excellent reputation on the international market as a livestock trading organisation since its establishment at the end of the fifties. The Pali group trades in a responsible way and pays much attention to animal welfare. Our network of contacts with goat farmers, traders, feed producers and slaughterhouses is very extensive. We have an extensive European buying and selling market at our disposal. We offer all our clients expert and personal support. We supervise and advise our clients over the whole sequence of the chain of production. An accurate and speedy administrative and financial settlement speaks for itself.

Monitoring quality is of utmost importance. Our integral approach and the professional interplay between the links in the chain guarantee a perfect quality product. The Pali Group closely checks each part of the chain and can give complete and reliable information about the products and the production method at any given time. The quality of our activities and products is guaranteed by the KCV certificate of quality (Livestock Certificate of Quality).
