

Attention to quality and welfare

The Pali Group has a natural talent for trading in calves and cattle. We have grown into a modern internationally operating livestock trading organisation with an extensive client network through determined professionalism.

New-born calves are collected in selection centres all over Europe and brought together in uniform herds. We buy and sell new-born calves, stock animals, beef calves, young bulls and cattle of a high consistent quality and we supply calf farms, meat livestock farms and livestock dealers on a regular basis.

The Pali Group trades at a European level in:

- new-born calves
- stock animals
- veal calves (white)
- veal calves (rosé)
- young bulls
- cows.

We produce and sell:

- white veal
- rosé veal.

**PALI GROUP**

The Pali Group supervises the breeding of calves to stock animals for calf farms and beef farms within our own integrated companies. We have a wide buying and selling area at home and abroad for young bulls and cows, crossbreeds as well as pedigree beef breeds, at our disposal. White and rosé veal is processed at our own calf slaughterhouse, Vitelco in 's-Hertogenbosch.

The Pali Group has built up an excellent reputation on the international market as a livestock trading organisation since its establishment at the end of the fifties. The Pali group trades in a responsible way and pays much attention to animal welfare. Our network of contacts with livestock farmers, traders, feed producers and slaughterhouses is very extensive. The Pali Group closely checks each part of the chain and can give complete and reliable information about the products and the production method at any given time. We supervise and advise our clients over the whole sequence of the chain of production. An accurate and speedy administrative and financial settlement speaks for itself.

Monitoring the quality in the veal sector is of utmost importance. The Pali Group is affiliated to the SKV (Foundation for Quality Guarantee of the Veal Sector) and BCV (Belgian Controlled Veal). We use the services of leading transporters in possession of the Veewaardig Vervoer (Livestock friendly Transport) certificate. The quality of our activities and products is guaranteed further by certificates of quality such as IKB (Integrated Chain Control) and KCV (Livestock Certificate of Quality).
